

The device you are holding in your hands is your assistant in understanding your vehicle. You can install it in just a few moments and just listen to what your new connected car has to say.

- 1 Download the app from Google Play Store or Apple Store.
- 2 Launch the app & register with your email.
- 3 Register your first device, driver and vehicle.
- 4 Locate the port in your vehicle and plug the device in.

Make the best out of your vehicles!

That's it!

Now, all you have to do is give it a couple of minutes to boot up and sync with your vehicle, before starting the engine and using the app.
